

PROFILE

Driven Big Data & AI engineering student at ENSA Tetouan, specializing in data architecture, scalable pipelines, and machine learning. Proficient in leveraging modern technologies such as Apache Spark, Kafka, and Hadoop, alongside Python and SQL, to process complex datasets. Passionate about transforming raw data into intelligent, automated solutions and eager to contribute as a Data or ML Engineer.

EDUCATION

École Nationale des Sciences Appliquées de Tétouan (ENSA) <i>Engineering Degree in Big Data & Artificial Intelligence</i>	Tétouan, Morocco <i>Ongoing</i>
Baccalauréat Sciences Physiques <i>High School Diploma</i>	Morocco <i>2022 – 2023</i>

SKILLS

- Big Data & Data Engineering:** Apache Spark, Apache Kafka, Apache Airflow, Hadoop, ETL pipelines, Data Cleaning, Data Preprocessing & Manipulation
- Databases (SQL & NoSQL):** MySQL, PostgreSQL (Querying, Joins, Indexing, Stored Procedures), MongoDB, NoSQL
- Programming & Back-end:** Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), Django, REST APIs, Node.js, React, C
- Machine Learning & NLP:** Supervised Learning, KNN, Classification, NLP, EDA, Data Mining
- Data Visualization & BI:** Power BI, Excel
- Tools & Cloud:** Git, GitHub, VS Code, Jupyter Notebook, Cloud Basics, Docker
- Soft Skills:** Analytical Thinking & Problem Solving, Teamwork & Collaboration, Communication Skills, Attention to Detail

PROJECTS

- Academic Resource Portal (Big Data & AI Major) | *React, Node.js, MySQL***
 - Developed a centralized web platform to organize and share academic resources, student projects, and training courses.
 - Built a dynamic front-end using React and developed the back-end architecture and RESTful APIs using Node.js.
 - Designed the database structure to seamlessly manage courses and student portfolios, and implemented secure user authentication.
- Music Similarity System | *Python, Embeddings, ML*** 2022 – 2023
 - Developed a music similarity model that recommends the Top-10 most similar songs using audio embeddings and cosine similarity.
 - Extracted audio features, generated embeddings, and built a similarity search using vector distances.
 - Implemented ranking logic with similarity percentages and optimized system performance for fast recommendations.

CERTIFICATES

IBM Data Engineering Professional Certificate IBM	Oct. 2025 – Feb. 2026
– Courses Completed: Hands-on Introduction to Linux Commands & Shell Scripting, Getting Started with Git & GitHub, Databases and SQL for Data Science with Python, Introduction to Relational Databases (RDBMS), Python Project for Data Engineering, Python for Data Science (AI & Development), and Introduction to Data Engineering.	

LANGUAGES

Arabic: Native Bilingual **English:** Professional Working Proficiency **French:** Professional Working Proficiency
